90 mcg\*  
With Dose Indicator

**Albuterol Sulfate**  
Inhalation Aerosol

NDC 0054-0742-37

**Albuterol Sulfate**  
Inhalation Aerosol

90 mcg\*  
With Dose Indicator

**FOR ORAL INHALATION WITH ENCLOSED ACTUATOR ONLY**

**Attention Health Care Professionals:**  
Detach Patient's Instructions for Use from package  
prior and dispense with the product.  
**Net Contents 67 g**  
Contains no chlorofluorocarbons (CFCs)

Rx only

**Important:** Read carefully following directions. **WARNINGS:** The action of albuterol sulfate inhalation aerosol is to relax the airway muscles and therefore it should not be used to treat asthma attacks. Increasing the number or frequency of doses beyond that recommended by your physician can be dangerous. If recommended dosage does not relieve your asthma symptoms or symptoms become worse, seek immediate medical attention. Do not use albuterol sulfate inhalation aerosol other than as directed and only as prescribed by your physician. **Avoid spraying in eyes.** Contents under pressure. Do not use if the canister is stored near heat or open flame. Exposure to temperatures above 120°F may cause leakage. Do not puncture or crush canister into fire or incinerator.
